LinkedIn GitHub Portfolio

PROFESSIONAL SUMMARY

Frontend Developer with a Computer Science background and experience building responsive, feature-rich web applications using React.js, TypeScript, and JavaScript. Skilled in component-based architecture, state management, API integration, routing, and frontend testing. Experienced in developing interactive e-commerce platforms with complex business logic, reusable components, and responsive user interfaces.

EDUCATION

B.Tech. in Computer Science and Engineering **2022 – 2026**
Central University of Kashmir *Ganderbal, Kashmir*

CGPA: 8.48/10

EXPERIENCE

Frontend Developer Contributor
CodeSquad Community Website *Central University of Kashmir*

- Contributed to the development of the CodeSquad community website by building its homepage and additional frontend pages.
- Developed webpage layouts and interactive UI elements using HTML, CSS, and JavaScript.
- Collaborated on frontend development for a university technical community platform.

PROJECTS

Rentique – Luxury Fashion Rental Marketplace **Personal Project**
React 18 | TypeScript | Tailwind CSS v3 | TanStack Query *Vite | Recharts | Vitest*
GitHub

- Engineered a luxury fashion rental marketplace using React 18 and TypeScript, implementing modular architecture and separating asynchronous server state with TanStack Query from client state using React Context API.
- Developed date-range availability and booking engines with mathematical interval overlap detection, automated one-day cleaning buffers, multi-tier rental discounts, and refundable deposit calculations.
- Implemented URL-synchronized catalogue filtering with debounced search, alongside persistent customer dashboards, wishlist management, and booking cancellation workflows.
- Built an administrative dashboard with role-based route protection and inventory management; established GitHub Actions CI and validated functionality through 34 automated tests using Vitest and React Testing Library.

Auré – Clean Beauty E-Commerce Platform
React 19 | TypeScript | Tailwind CSS *Vite | React Router | Context API*
GitHub

- Developed an interactive cosmetics storefront featuring 36 product variants, multi-attribute filtering, debounced search, and URL-synchronized catalogue navigation using React Router.
- Built an interactive shade selection system synchronizing product swatches, undertones, stock availability, and variant imagery across complexion and lip products.
- Implemented persistent cart management using React Context and localStorage, featuring a dynamic free-shipping progress indicator, promotional rewards, and a three-step routine builder with automatic 15% bundle discount calculations.

TECHNICAL SKILLS

Programming Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3
Frontend Development: React.js, JSX, React Hooks, Functional Components, Component-Based Architecture, React Router
Styling: Tailwind CSS, CSS Flexbox, CSS Grid, Responsive Web Design, Media Queries
State Management: React Context API, TanStack Query, Props, localStorage
Web Technologies: REST API Integration, Axios, Fetch API, Promises, Async/Await, DOM Manipulation, Event Handling, Form Validation, URL Search Parameters
Testing & Data Visualization: Vitest, React Testing Library, Recharts
Development Tools: Git, GitHub, VS Code, Chrome DevTools, npm, Vite

LEADERSHIP EXPERIENCE

Lead – AI/ML Club
Central University of Kashmir *Student Technical Community*

- Directed club activities, including study sessions and hands-on technical workshops.
- Guided student teams in developing projects using Python, TensorFlow, and Scikit-learn.
